

## CLAIMS

1. A skin treatment composition comprising  
anti-bacterial zeolite and trisalt  
5 ethylenediaminehydroxyethyl triacetate.
2. A skin treatment composition comprising  
anti-bacterial zeolite and alum and/or dried alum.
3. The skin treatment composition of claim 2 wherein  
the content of said anti-bacterial zeolite is 0.1-90  
10 mass % of the total amount of the deodorizing  
cosmetic.
4. The skin treatment composition of claim 2 or 3  
wherein the content of said alum and/or dried alum is  
0.1 or more in terms of the mass ratio to said  
15 anti-bacterial zeolite.
5. The skin treatment composition of claim 2, 3, or  
4 wherein the content of said anti-bacterial zeolite  
is 0.1-70 mass % of the total amount of the deodorizing  
cosmetic and the content of said alum and/or dried  
20 alum is 0.01-80 mass % of the total amount of the skin  
treatment composition.
6. The skin treatment composition of claim 2, 3, 4,  
or 5 wherein the average particle size of said  
anti-bacterial zeolite is 10 micrometers or less, the  
25 particle size distribution is such that 20% or less

of them have a particle size larger than 15 micrometers, and the average particle size of said alum and/or dried alum is 0.01-50 micrometers.

7. A skin treatment composition comprising  
5 anti-bacterial zeolite and polyoxyethylene polyoxypropylene 2-decyltetradecyl ether.

8. The skin treatment composition of claim 7 wherein the polyoxyethylene unit of the polyoxyethylene polyoxypropylene 2-decyltetradecyl ether is 20-28

10 E.O. and the polyoxypropylene unit is 10-16 P.O.
